

# SPLIT BAMBOO

VERSATILE AND HIGH QUALITY

## Natural Split Bamboo

Split bamboo is light and strong, with a lifespan that makes it extremely suitable for the plants uses. Thanks to our unique anti-mould treatment, which we developed in-house, our split bamboo is much more resistant to moisture and can be used for a wide range of vegetables and indoor plants. We can also supply our split bamboo plasticized. Natural split bamboo is very well suited for machine staking because of the uniformity in size.
