

TONKIN

NATURALLY SUITABLE FOR OUTDOOR USE

Tonkin Cane

The unique properties of tonkin plant stakes make this support material extremely suitable for use by the horticulture sector. Tonkin canes are strong, weather-resistant, and have a long lifespan. Rain, cold, drought and wind: tonkin can withstand it all. These canes are checked on quality by our colleagues in our Chinese factory. Our tonkin is available in any color and can be partially or fully plasticized.
